although the fields medal does not have the same public recognition as the nobel prizes they share a similar intellectual standing it is restricted to one field that of mathematics and an age limit of 40 has become an accepted tradition mathematics has in the main been interpreted as pure mathematics and this is not so unreasonable since major contributions in some applied areas can be and have been recognized with nobel prizes a list of fields medallists and their contributions provides a bird s eye view of mathematics over the past 60 years it highlights the areas in which at various times greatest progress has been made this

volume does not pretend to be comprehensive nor is it a historical document on the other hand it presents contributions from fields medallists and so provides a highly interesting and varied picture the second edition of fields medallists lectures features additional contributions from the following medallists kunihiro kodaira 1954 richard e borchers 1998 william t gowers 1998 maxim kontsevich 1998 curtis t mcmullen 1998 and vladimir voevodsky 2002

a republication of this highly significant work of 1965 this book addresses the defence of superior orders in the context of national and international law providing a detailed analysis that remains relevant with a new preface by the author this book is an accessible text for scholars and practitioners of international criminal law

the legal consequence of the superior orders defense has long been debated as one of the major problems in international criminal law several controversial issues such as the immunity of the state the absolute character of military discipline and immunity on the grounds of mistake of law and or coercion have been complexly interwoven in the debates the execution of illegal orders and international criminal responsibility provides a comprehensive portrait of the relevant debates at the international level up to the present analyzes the conflicting views and shows the significance of the development of international rules for the superior orders defense as well as the implication of the fact that issues concerning some detailed or related rules have been left unresolved this study presents to present a new standpoint not only on dealing with the problem of the superior orders defense but also on reconsidering the international stipulation of rulemaking with regard to criminal matters

digital signal processing a primer with matlab provides excellent coverage of discrete time signals and systems at the beginning of each chapter an abstract states the chapter objectives all principles are also presented in a lucid logical step by step approach as much as possible the authors avoid wordiness and detail overload that could hide concepts and impede understanding in recognition of requirements by the accreditation board for engineering and technology abet on integrating computer tools the use of matlab is encouraged in a student friendly manner matlab is introduced in appendix c and applied gradually throughout the book each illustrative example is immediately followed by practice problems along with its answer students can follow the example step by step to solve the practice problems without flipping pages or looking at the end of the book for answers these practice problems test students comprehension and reinforce key concepts before moving onto the next section toward the end of each chapter the authors discuss some application aspects of the concepts covered in the chapter the material covered in the chapter is applied to at least one or two practical problems it helps students see how the concepts are used in real life situations also thoroughly worked examples are given liberally at the end of every section these examples give students a solid grasp of the solutions as well as the confidence to solve similar problems themselves some of the problems are solved in two or three ways to facilitate a deeper understanding and comparison of different approaches designed for a three hour semester course digital signal processing a primer with matlab is intended as a textbook for a senior level undergraduate student in electrical and computer engineering the prerequisites for a course based on this book are knowledge of standard

mathematics including calculus and complex numbers

whose law must i obey this question is so basic to our legal obligations that it ought to be easy specifically a person considering an action ought to be able to answer this question by the use of law like rules this ought to be particularly true of criminal law which will be the principal focus of this book actually this question is partially unanswerable in the world as it exists today whether by accident or design the current structure and content of law national and international sometimes prevents persons natural or juridical from being able to answer the question fully at the time of action

one of the most unusual women of the twentieth century meret oppenheim most famously created the legendary le d®jeuner en fourrure her 1936 assemblage of a tea cup and a fur but oppenheim was not just a surrealist mouthful though she provided the movement with one of its most recognizable symbols like her counterparts max ernst marcel duchamp andr® breton and man ray she used found materials freely in her artworks often to the point of creating a critical alienation of the viewer from an otherwise familiar object her greater oeuvre has often been subsumed by the dominance of the ubiquitous fur cup a situation which this publication aims to remedy presenting a career spanning selection of witty drawings paintings objects collages poems and designs for applied artworks fantastic clothes jewelry and furniture shortly before her death oppenheim and editor thomas levy developed the idea of realizing some of her applied artworks those that were made to appear here through photo documentation also included are scholarly essays an exhibition list a bibliography and a filmography
